EXPERIENCE

AI Engineer Intern

Feb. 2026 – Present

Finz (FinTech Startup)

Boston, MA

- Built a production agentic CFO assistant on **Google ADK**, **Gemini (Vertex AI)**, and **LangGraph**, routing across **21 finance tools** and splitting intent resolution, grounded tool retrieval, and LLM synthesis so answers trace back to real ledger data.
- Built a document extraction pipeline that sends table-heavy financial statements to **Docling** and scanned invoices and bills to **Gemini vision**, pulling line items into structured records the agent can retrieve.
- Shipped an **LLM evaluation and observability** framework with numeric grounding checks that catches hallucinated figures and mis-routed queries.
- Shipped a **Flutter/Dart** mobile client with a **Gemini voice agent** that answers spoken financial questions through the same tool layer.
- Designed a two-stage classifier that shortlists candidate vendors, then Chart of Accounts entries, by fuzzy string matching, constraining the LLM to closed-set selection to eliminate out-of-ledger hallucinations. Reached **98.8% auto-classification** on a client's live ledger feeding auditable P&L statements and balance sheets.

Research Assistant, LLM Platform

Sep. 2025 – Jan. 2026

BU BIT Lab

Boston, MA

- Built a **LangGraph** memory system blending short-term history with vector retrieval to stop context drift in long sessions.
- Developed agentic query routing (intent classification, specialized prompt chains, tool calling) with per-step latency and token logging for systematic evaluation.

Full Stack Developer

Sep. 2024 – May 2025

Citale (BU Spark! Launch Lab)

Boston, MA

- Shipped real-time messaging and event maps with **Next.js** and **Supabase** on an indexed PostgreSQL schema.

PROJECTS

Multi-Agent LLM Narrative System | *LangGraph, Gemini, Supabase*

- Built a four-agent pipeline (Director, Planner, Writer, Editor) where a deterministic state machine drives narrative phase and the LLM only fills each step.
- Added an Editor agent that validates each draft against the plan and returns structured rewrite instructions, looping the Writer until it passes.

TECHNICAL SKILLS

LLM & Agents	LangGraph, LangChain, Google ADK, Gemini / Vertex AI, RAG, Tool Calling, Multi-Agent Orchestration, Memory Management, Multimodal Document Extraction
Evaluation	LLM Evaluation, Grounding / Hallucination Checks, Entity Resolution, Classification, Tracing, Latency & Token Instrumentation
Backend & Data	Python, TypeScript, Dart, SQL, FastAPI, Next.js, Flutter, PostgreSQL, MongoDB, Pinecone, Kafka, Redis, Docling (structured PDF parsing)
Cloud & DevOps	GCP (Vertex AI), AWS, Azure, Docker, GitHub Actions, Supabase, Linux

EDUCATION

Boston University

Jan. 2026

M.S. in Data Science | Best Overall, BU DS+X Hackathon 2025 (RhettSearch)

Boston, MA

National Taiwan University of Science and Technology

Jun. 2023

B.B.A. in Industrial Management & Finance, Minor in Computer Science

Taipei, Taiwan
